

Hand disinfectant 0.15%

PT 01: Human hygiene

Contains: 0.15% (w/w) (1,425 g/L) Didecyldimethylammonium chloride.)

This product does not require labeling under the CLP Regulation 1272/2008.
Keep out of the reach of children.

First aid advice and information about probable direct and indirect effects:

If ingested:

Rinse your mouth out thoroughly and drink 1–2 glasses of water in small sips. Seek medical attention if you experience persistent discomfort.

Skin contact:

The product is intended to come into contact with the skin. Rinse with water if you experience a stinging sensation in a cut or wound.

Eye contact:

If the product comes into contact with your eyes, rinse with water (preferably eyewash) until irritation subsides. Seek medical attention if irritation persists.

Instructions, frequency of use and dosage:

Used for human hygiene on the skin of the hands for the primary purpose of disinfecting the surface of the hands, between the fingers, the thumb and the finger nails.

Biocides should be used with care. Always read the label and product information before use.

Instructions for the safe disposal of the product and its packaging:

The product is considered hazardous waste under the Danish Waste Order. It is recommended that spillage and waste should be disposed of via the municipal waste system with the following specifications.

06 13 01 (Inorganic plant protection products, wood-preserving agents and other biocides). Chemical waste group: H.

Empty packaging and residue should be disposed of via the municipal waste system for hazardous waste.

Analysis:

Didecyldimethylammonium chloride	(CAS No.: 7173-51-5)	1,425 g/L	0.15% (w/w)
